

## RDX<sup>®</sup> QuikStation<sup>®</sup> v2.9 Password Feature

February 2021

## **Overview**

With the release of RDX QuikStation firmware version v2.9 for both QuikStation 4 and QuikStation 8, a new level of security is introduced using tighter password controls.

## **Feature Details**

The first time the user logs into the RDX QuikStation, they are required to create a new, uncommon Administrator's password. A reset password pop-up screen is displayed when connected via a browser.

This is your first time logging in. Plea bassword	ase enter a new administrator

The password must meet the following requirements:

- It must be between 12 to 30 characters in length.
- The password can contain only letters (case sensitive), numbers, and any of these special characters:

-.!@#\$%^&\*\_"",

• Password is allowed only if it is uncommon and meets certain complexity minimums.

A list of common passwords 12 -30 characters in length are used to check the new password. If the new password is found on the list, it is blocked and the user must choose a different one.

Result of attempting to set password = qwerty123456	
Set 'Admin' Account F	Password
	e is used to login and manage this system ount. The minimum password length is 12 min' account.
