

NEO S-Series Firmware Version 5.70 Release Announcement

October 2021

Preface

This Release Bulletin announces the release of NEO S-Series firmware version 5.70 for all NEO S-Series libraries.

Models Affected

NEO S-Series firmware version 5.70 is supported as an upgrade for NEO StorageLoader and T24 libraries running NEO 5.60.

Upgrade Considerations

All systems running firmware version 5.60 can be upgraded to firmware version 5.70.

CAUTION: To prevent data corruption, verify that all active backup and recovery jobs to the NEO tape library are completed prior to performing the upgrade.

Downgrades

Downgrades are not supported.

NEO S-Series 5.70 New Features

Description	Severity
SSH to RMI (slow) Patch to set PSH flag applied for SSH to RMI operations	Moderate
Support for new Robotics controller hardware Changes done in robotics controller firmware and library controller firmware to support new robotic hardware. Firmware downgrade to previous code versions will be prevented in case new robotic hardware is detected.	Moderate

Downloads

NEO S-Series firmware version 5.70 is available for download for supported NEO users with active software entitlement agreements. Go to https://download.overlandtandberg.com/Firmware/Neo_Series/NeoS/.

Additional documentation on how to operate, configure, and support your NEO library is available at <https://www.overlandtandberg.com/knowledgebase/>.
